## Complete IT Management.

The IT management software space has long been dominated by complex, difficult-to-use, and siloed tools that lead to on-going hidden costs, bring technician workflows to a halt, and pose a security risk. NinjaOne replaces these legacy point-solutions with a natively integrated, 100% network- and location-agnostic IT management solution that enables

## The Unified IT Management Platform

The NinjaOne unified IT management platform gives you everything you need to manage your users and endpoints from a single, centralized console, anywhere in the world.

Unlike siloed solutions, each NinjaOne solution interacts natively with the entire platform, giving a richer, more contextual view into end-user requests, endpoint health, infrastructure, and security.

NinjaOne gives you unparalleled visibility into and control over the entire infrastructure, operations, and support workflows, ensuring technicians are efficient, business users

### Why NinjaOne?

NinjaOne supports over 10,000 MSPs and IT departments around the world, and is consistently ranked #1 for its world-class customer support. NinjaOne has been recognized as the best rated software in its category on G2 and Gartner Digital Markets for the past 3 years.
