---

Before we dive in, a few quick notes regarding our methodology and the purpose of this guide.

## Sources

The following ratings were collected from third-party review sites G2 and Capterra in March 2025.

## What “--” indicates

The particular data point was either unavailable at the time of our collection, or the product did not meet our cutoff of having five or more reviews.

## These lists are obviously not comprehensive

The IT software market contains many tools not seen here. Creating a truly exhaustive list is an undertaking left to more adventurous souls. We have simply done our best to include the major players in each category geared toward modern IT management, and that have at least five reviews available.

## How to best use this guide

This guide is not meant to be the final word on the value of these solutions. Many factors go into choosing the right software. User ratings are just one. Therefore, this guide primarily serves as a jumping-off point for additional research.

## Endpoint Monitoring & Management

With many admins now responsible for managing an increasingly complex variety of systems and devices, the ability to centrally manage them all has become a core requirement for modern IT administration. The following are the highest-ranked endpoint management tools, with MDM solutions and tools designed specifically for Apple devices ranked in their own subgroups.

Change from 2024	Rank			G2					Capterra		
				Overall	Meets Reqrmnts.	Ease of Setup	Ease of Use	Quality of Support	Overall	Ease of Use	Customer Service

## IT Asset Management

You can't secure or manage what you can't see. That's why it's important for admins to leverage software that can discover, track, and provide real-time insights on all their IT assets.

				G2					Capterra		
Change from 2024	Rank			Overall	Meets Reqrmnts.	Ease of Setup	Ease of Use	Quality of Support	Overall	Ease of Use	Customer Service

# About NinjaOne

**Founded:** 2013

**Headquarters:** Austin, TX

NinjaOne is the unified IT management platform behind thousands of IT teams worldwide. Our easy-to-use dashboard reduces IT complexity and modernizes IT management.

## Easy to use. Easy to do business with.

- + No contracts, no getting locked in
- + No implementation fees or hidden costs
- + Free and unlimited training, support, and onboarding

With NinjaOne, you get a full-service tool to help you manage your IT environment, including endpoint management, patch management, MDM, backup, ticketing, remote access, and more. By condensing all of your IT management solutions into a unified IT management platform, you can reduce tool sprawl and work with a single vendor for almost all of your IT management needs.

“Two things really stand out: NinjaOne’s ease-of-use and NinjaOne’s support. I love how easy it is to learn NinjaOne, and I love being able to pick up my phone and talk to a person.”

**Andrew Jones**, City of Vidalia
