

Browser Management

ninjaOne®

Extend endpoint management to the browser. Gain continuous visibility, enforce policies, and control extensions and web access across Chrome, Edge, and Firefox with no new tools or infrastructure required.

Key features

Browser extension inventory

Automatically discover every extension installed across managed devices. Get a real-time view of what's running in the browser without manual audits or scripting.

Extension risk scoring

Every discovered extension is scored for risk. Quickly identify high-risk extensions, prioritize remediation, and make informed decisions about what to allow or block.

Custom end-user block messages

Show users a tailored message when they hit a blocked site or extension. Reduce help desk tickets and keep users informed without IT getting involved.

Website and domain blocking

Block access to specific websites, domains, or content categories across managed devices. Enforce acceptable use policies and reduce exposure to phishing, malware, and unauthorized SaaS or AI tools.

Extension policies: deployment, blocking, and default-deny

Deploy approved extensions centrally, block specific extensions by ID, or enforce a default-deny model where only pre-approved extensions are permitted. Reduce shadow IT with flexible, layered controls.

Browser activity history

Access browsing history across managed devices to support incident response, compliance audits, and service desk troubleshooting, without relying on network-level tooling.

Multi-browser policy management

Manage Chrome, Edge, and Firefox from a single workflow. Apply consistent policies and configurations across all supported browsers regardless of what your users prefer to use.

Browser Management is built directly into the NinjaOne platform. No new tools to deploy, no new infrastructure, no new logins. Manage the browser the same way you manage every other endpoint.

HUMAN-CENTERED AI

10-15

TOOLS REPLACED

“Before, I needed 10-15 different tools to execute what NinjaOne does in its centralized, single pane of glass.”

Vetcor

98%

CSAT SCORE

“I have never experienced the speed or knowledge of support the NinjaOne team exhibited with any other RMM vendor.”

InHouse Support

30%

LESS TIME FOR PATCHING

“We observed a 30% reduction in the time taken for patch deployments compared to our previous solution.”
